

## **Financial Report**

First Quarter - Fiscal Year 2023

**April 30, 2022**

## Ortho Regenerative Technologies Inc.

### Management's Discussion and Analysis for the three months ended April 30, 2022

*(In thousands of Canadian dollars, except for units, share and per share amounts)*

#### MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

This Management's Discussion and Analysis ("MD&A") for Ortho Regenerative Technologies Inc. (the "Corporation" or "ORT") provides an overview of the Corporation's operations, performance and financial results for the first quarter of our 2023 fiscal year ended on April 30, 2022 and compares those of the same period in 2022 fiscal year. This MD&A is the responsibility of management and has been reviewed and approved by its Board of Directors. The Board of Directors is responsible for ensuring that management fulfills its responsibilities for financial reporting and is ultimately responsible for reviewing and approving the MD&A. The Board of Directors carries out this responsibility principally through its Audit Committee. The Audit Committee is appointed by the Board of Directors and is comprised of financially literate directors. This report was reviewed by the Corporation's Audit Committee and approved by ORT's Board of Directors on June 20, 2022. This document should be read in conjunction with the unaudited financial statements and notes thereto for the first quarter of our 2023 fiscal year ended on April 30, 2022, which have been prepared in accordance with International Financial Reporting Standards ("IFRS"). Further information about Ortho Regenerative Technologies Inc., is available online on SEDAR at [www.sedar.com](http://www.sedar.com).

Unless otherwise noted, all amounts are presented in thousands of Canadian dollars, except for share and per share amounts.

#### Going concern

This MD&A has been prepared on a going-concern basis, which implies that the Corporation will continue realizing its assets and discharging liabilities in the normal course of business for the foreseeable future. As reflected in the annual audited financial statements, the Corporation is still a clinical stage R&D company and has not yet achieved profitability. During the first quarter ended on April 30, 2022, the Corporation incurred a net loss of \$0.85 million, and used cash in operations of \$0.7 million. As at the end of the first quarter of fiscal year 2023, the Corporation had a working capital surplus of \$0.6 million. Consequently, the Company's performance raises significant doubt about the Company's ability to continue as a going concern.

Accordingly, the ability of the Corporation to realize the carrying value of its assets and continue operations as a going concern is dependent upon its ability to obtain additional financing and ultimately on generating future profitable operations. Management anticipates that the continued advancement of its lead Ortho-R program will facilitate securing additional funds from existing and new investors. There is no assurance that any fund-raising initiatives will be successful. Factors within and outside the Corporation's control could have a significant bearing on its ability to obtain additional financing. The unaudited financial statements as at and for the quarter ended April 30, 2022, do not include any adjustments related to the carrying values and classifications of assets and liabilities that would be necessary should the Corporation be unable to continue as a going concern.

#### Covid-19 pandemic

The outbreak of a novel strain of coronavirus, identified as "COVID-19", was declared a global pandemic by the World Health Organization on March 11, 2020, and is still adversely affecting the global economy despite the efforts by local governments to vaccinate their populations and reduce the economic adverse effects of COVID-19. In response, many countries have required entities to limit or suspend business operations and implemented travel restrictions and quarantine measures. Some non-essential activities were canceled or delayed due to COVID-19. These measures have disrupted the activities of many entities and have led to significant volatility in the global markets. The Corporation continues to monitor and actively manage the developing impacts from COVID-19, including but not limited to, the effect on the Corporation's clinical development phases, potential future effects on its assets, cash flow and liquidity, and will continue to assess impacts to the Corporation's operations, going concern assumption, and the value of assets and liabilities reported in its financial statements. Elective surgeries levels are key to ensure enrollment in our US Phase I/II clinical trial on rotator cuff tear repair. Based on recent interactions with the clinical centers involved in the clinical trial, scheduling and rate of elective surgeries are back to pre-pandemic levels and consequently should not impact patient enrollment.

#### Non-IFRS Financial Measures

This MD&A refers to certain non-IFRS measures. Management uses these non-IFRS financial measures for purposes of comparison to prior periods and development of future projections and earnings growth prospects. This information is also used by management to measure the results of ongoing operations and in analyzing our business performance and trends. These measures are not recognized measures under IFRS, do not have a standardized meaning prescribed by IFRS and are therefore unlikely to be comparable to similar measures presented by other companies. Rather, these measures are provided as additional information to complement those IFRS measures by providing further understanding of our results of operations from management's perspective. Accordingly, they should not be considered in isolation nor as a substitute for analysis of our financial information reported under IFRS. We use a non-IFRS measure, "EBITDA Loss", to provide supplemental measures of our operating performance and thus highlight trends in our core business that may not otherwise be apparent when relying solely on IFRS financial measures. EBITDA Loss is defined as net loss before (i) provision for (recovery of) income taxes; (ii) interest (income) expense and other financing costs; (iii) depreciation; and (iv) amortization of intangible assets.

#### Cautionary note regarding forward-looking statements

This MD&A may contain some forward-looking information as defined under applicable Canadian securities laws. Forward looking information can generally be identified using forward-looking terminology such as "may", "anticipate", "expect", "intend", "estimate",

# Ortho Regenerative Technologies Inc.

(In thousands of Canadian dollars, except for units, share and per share amounts)

"continue" or similar terminology. Forward looking information is subject to various known and unknown risks and uncertainties, many of which are beyond the ability of the Corporation to control or predict, that may cause the Corporation's actual results or performance to be materially different from actual results and are developed based on assumptions about such risks and other factors set out herein.

### GLOSSARY TERMS

#### Calendar & Financial

CDU	Convertible Debenture Units
EBITDA (L)	EBITDA Loss
FV	Fair Value
FY	Fiscal Year
G&A	General and Administrative
IR	Investors Relations
ITC	Investment tax credits
NCDUs	Non-Convertible Debenture Units
Q1-23	First quarter FY-23
Q4-22	Fourth quarter FY-22
Q3-22	Third quarter FY-22
Q2-22	Second quarter FY-22
Q1-22	First quarter FY-22
Q4-21	Fourth quarter FY-21
Q3-21	Third quarter FY-21
Q2-21	Second quarter FY-21
SR&ED	Scientific Research and Experimental Development Expenses
R&D	Research and Development
YTD	Year to date
YE	Year-end
W/C	Working Capital, defined as short-term assets less short-term liabilities

#### Corporate & Operations

API	Active Pharmaceutical Ingredient
CMC	Chemistry Manufacturing and Controls
cGMP	current Good Manufacturing Practice
CMO	Contract Manufacturing Organization
CSE	Canadian Securities Exchange
FDA	US Food and Drug Administration
IND	Investigational New Drug application with the FDA
MCRA	MCRA, LLC, a US based orthopedic specialty CRO
MRI	Magnetic Resonance Imaging
MTA	Material Transfer Agreement
ORT	Ortho Regenerative Technologies Inc.
ORTHO-C	Proprietary biopolymer for Articular Cartilage repair
ORTHO-M	Proprietary biopolymer for Proprietary Biopolymer for Meniscus repair
ORTHO-R	Proprietary biopolymer for Rotator cuff repair
ORTHO-V	Proprietary biopolymer for Osteoarthritis healing
OTCQB	US over-the-counter venture trading market
Polytechnique	Ecole Polytechnique de Montreal
PRP	Platelet-rich plasma
Pre-RFD	Pre-Request for Designation

## OVERVIEW OF THE BUSINESS AND BUSINESS STRATEGY

ORT is a clinical stage drug biotech company incorporated under the Canada Business Corporations Act. The Corporation's head office, principal address and registered office is located at 16667 Hymus Blvd., Kirkland, Quebec, Canada and its wholly owned US subsidiary, OR4102022 Inc. has been incorporated on April 20, 2022 (See "Subsequent Events") and is located at 12 Penns Trail in Newtown, Pennsylvania, USA. The Corporation's shares are publicly traded on the CSE under the symbol "ORTH", as well as on the United States OTCQB market under the symbol "ORTF".

The Corporation is developing products in the regenerative medicine market, one of the most dynamic and promising sectors of the health care industry.

### Regenerative Medicine Overview

The concept of regenerative medicine is to provide us with tools to return anatomy and physiology to a more normal appearance and behaviour. Although there are many definitions, of what constitutes regenerative medicine, the following is succinct:

Regenerative Medicine is an emerging interdisciplinary field of research and clinical applications focused on the repair, replacement or regeneration of cells, tissues or organs to restore impaired function resulting from any cause, including congenital defects, disease, trauma and aging. It uses a combination of several technological approaches that moves it beyond traditional transplantation and replacement therapies. These approaches may include, but are not limited to, the use of soluble molecules, gene therapy, stem cell transplantation, tissue engineering and the reprogramming of cell and tissue types.

Combinations of these approaches can 1) improve the natural healing process in areas of the body it is needed most, 2) take over the function of a permanently damaged organ, 3) heal or repair a damaged organ or tissue, or 4) deliver healing "accelerators" chemicals that might inspire repair to specific damaged areas of the body.

Regenerative medicine is a relatively new and rapidly expanding field that brings together experts in biology, chemistry, materials and computer science, engineering, genetics, robotics, and other fields to find solutions to some of the most challenging medical problems faced by humankind. We believe ORTHO is at the forefront of this rapidly expanding field.

**Ortho Regenerative Technologies Inc.**

**Management’s Discussion and Analysis for the three months ended April 30, 2022**

*(In thousands of Canadian dollars, except for units, share and per share amounts)*

The Global Regenerative Medicine Market was a \$US9B market in 2021 and is projected to grow at 22.8% CAGR through 2030. It is one of the most dynamic markets in medicine today. The musculoskeletal and wound healing segment accounted for about 60% share of the regenerative medicine market in 2021. Cell therapies are used in the treatment of musculoskeletal diseases such as bone tissue replacement, cartilage, tendon, and ligament repair and replacement.

Regenerative medicine is applicable in cardiovascular, oncology, dermatology, musculoskeletal, wound healing, ophthalmology, neurology, and others. The musculoskeletal application segment accounted for the largest share in 2021, whereas cardiovascular is expected to be the fastest-growing segment, registering a CAGR of 24.3% during the forecast period (2022-2030).

**Problem & Solution**

The delivery of a tissue scaffold, cellular or molecular therapy or any combination thereof makes a fundamental assumption; that the substance(s) will stay where they were placed and function as desired; if they wander off-target, the desired enhanced healing might not occur and furthermore, the potential exists for off-target effects.

Providing a reliable, biologically safe transport mechanism that would allow the targeted body system to receive the regenerative material to aid in body system repair is, therefore, a mission-critical goal and a problem that requires solving.

Ortho Regenerative Technologies (ORT) has acquired just such a solution from the Polytechnique at the University of Montreal. Our Patented **Drug/ Biologic/ Combination** technology platform, is a muco-adhesive CHITOSAN based biopolymer matrix, specifically designed to be combined with biologics such as Platelet-Rich Plasma (PRP) or Bone Marrow Aspirate Concentrate (BMAC), to augment and accelerate the regeneration of new tissue in various potential indications.

**BUSINESS STRATEGY**

1. Perform Rotator Cuff Repair proof of concept phase I/II clinical trial program to establish regenerative platform
2. Leverage Polytechnique partnership to obtain non-dilutive grants to drive proof of concept in multiple potential indications
3. Leverage our proprietary platform beyond orthopedic applications by seeking R&D and/or development partners for each high potential application
  - o Leverage strong global method and composition patents
  - o Leverage initial IND from FDA to initiate multiple development programs
4. Seek regulatory clearance in other high value jurisdictions

**1. Perform Rotator Cuff Repair proof of concept phase I/II clinical trial program to establish regenerative platform**

**ORTHO R** is formulated and designed to improve the healing of occupational and sports related injuries to tendons, meniscus, and ligaments.

ORTHO-R is a patent-protected freeze-dried formulation of a biopolymer, a lyoprotectant and a clot activator. ORTHO-R is solubilized in platelet-rich plasma (“PRP”) to form an injectable combination of the chitosan scaffold and the PRP-biologic, and an FDA designated bioactive implant that coagulate after implantation. In vitro testing has allowed the Corporation to identify specific formulations that meet the following criteria for optimal commercial products:

- (i) rapid and complete solubilization in PRP;

### Management's Discussion and Analysis for the three months ended April 30, 2022

(In thousands of Canadian dollars, except for units, share and per share amounts)

- (ii) biopolymer-PRP mixtures having paste-like handling properties desired by surgeons;
- (iii) biopolymer-PRP mixtures that coagulate rapidly to form soft tissue-adherent Drug-Biologics hybrid implants;
- (iv) biopolymer-PRP biologics implants that are mechanically stable and resist platelet-mediated clot retraction; and
- (v) dispersion of the biopolymer in the implants that is homogenous for optimal biodegradability.

The polymer-biologics hybrid mix, designated as drug/biologic combination product by the FDA, but may be considered a medical device by other regulatory jurisdictions, can be directly applied at the site of injury by a surgeon during a routine operative procedure without significantly extending the time of surgery and without further intervention. A US FDA IND was granted in December 2021, to start a Phase I/II Rotator Cuff Tear Repair clinical trial at 10 US sites.

The use of ORTHO-R as an adjunct to standard of care suturing techniques produced promising histological findings in small and large animal experimental models, which is hoped to translate to faster and superior rotator cuff repair in humans. No adverse events were found in any of the above-mentioned animal studies, which suggests a high level of safety. Progress made during the recent quarters have set the stage for achievements of major corporate/regulatory/strategic milestones over the current and upcoming calendar years.

**Market Opportunity:** (Source: Pearl Diver HealthCare Research, iData Research.) for first clinical application

Close to 700K shoulder rotator cuff repairs are performed in North America every year with an unfortunate 20% to 90% failure rate. ORT has already initiated its FDA designated Phase I/II study giving it the regulatory lead in the US for launching the first FDA approved drug/biologic combination for augmenting the performance of the standard of care surgical shoulder cuff repair.

The orthopedic and sports medicine soft tissue repair market is a \$11B+ global market. The ORTHO-R product is targeting the following soft tissue repair indications: rotator cuff Tear repair: 4M injuries and 700K surgeries/year (50%+ failure rate) in USA alone, Tendinopathy, 11M injuries/year, and Meniscus Tear repair: 1.2M injuries/year and 200K+ surgeries/year (40% failure rate) in USA alone. Standard of care for these injuries is surgery alone. The orthopedic community are looking for better treatments to improve patient outcomes and reduce procedure failure rate.

This market opportunity is further enhanced by the fact that surgeons all over the world know that soft tissue such as ligaments, tendons and meniscus are not well vascularized and thus when repaired with the standard of care (sutures, anchors, and staples) results in healing principally with scar tissue which is more fragile and susceptible to re-tear than native tissue. Given the believe by many that platelet rich plasma (PRP) improves the quality of tissue healing, surgeons have vocalized a desire to find a way to make PRP resident to the surgical repair site, so that the PRP can trigger the tissue repair cascade to these troublesome non-vascularized soft tissues. Surgeons have been using PRP for over a decade but are frustrated by the inability for the PRP alone to establish residency on the surgical repair site due to its highly liquid nature. ORTHO-R is specifically designed to overcome the residency issue due to its unique and patented composition. Therefore, once approved, a ready-made and very large market can be rapidly satisfied thus reducing go to market investment by the company, development partner or acquirer of our technology.

In November 2017, FDA published a memo to the regenerative medicine industry stating that orthopedic regenerative products now require a Biologics License Application (BLA) from the Center for Biologics Evaluation and Research (CBER) at FDA. According to the FDA memo: "Regenerative medicine therapies have not been approved for the treatment of any orthopedic condition, such as osteoarthritis, tendonitis, disc disease, tennis elbow, back pain, hip pain, knee pain, neck pain, or shoulder pain". Therefore, a Biologic License is required by ORT, and thus comprehensive pre-clinical and clinical trials are required to demonstrate safety and effectiveness of orthopedic regenerative treatments. ORT coincidentally had already begun its pre-clinical work at that time and have already obtained an IND in December 2021. We believe that ORT is therefore in the regulatory lead to bring the first biologic licensed drug/biologic orthopedic regenerative medicine to the market.

### ORTHO-R®: Key points of differentiation

Unlike other natural biopolymer matrix such as Hyaluronic Acid (HA) or Collagen, the chitosan natural biopolymer molecules are positively charged and therefore are muco-adhesive (sticky) to the negatively charged soft tissues of the human body (tendons, ligaments, meniscus). Characteristics related to the electrostatic binding of the combination product, resulting modification of cell function, slowing of blood clot retraction and extended release of growth factors compared to PRP alone provided justification for classification of the product as a drug. It is therefore a perfect matrix system for biologics such as PRP, used in various musculoskeletal injury conditions. ORTHO-R has a fast coagulation onset, and with its muco-adhesive feature offer the unique benefit of significantly increasing the in-situ residency time of PRP implants from less than 24 hours for PRP alone to up to 6 weeks for ORTHO-R chitosan-PRP drug/biologic combination product, allowing PRP to contribute to the normal healing cascade. ORTHO-R becomes the desired solution option for the orthopedic soft tissue repair community, by addressing the actual limited clinical outcomes resulting from short lived / washed out use of PRP alone in clinical orthopedic practice.

**Ortho Regenerative Technologies Inc.**

**Management’s Discussion and Analysis for the three months ended April 30, 2022**

*(In thousands of Canadian dollars, except for units, share and per share amounts)*

**Preclinical:**

In Q4-21, we successfully completed the preclinical pivotal study safety and clinical histology analysis, statistical analysis and final report. The final study report confirmed the safety of Ortho-R as well as the evidence that our biologics hybrid implant delivered as an adjunct to standard of care surgery, improved tendon, tendon insertion site and overall repair in rotator cuff Tear repair compared to standard of care surgery alone. [https://www.orthorti.com/cms\\_files/phpfQwJvt.pdf](https://www.orthorti.com/cms_files/phpfQwJvt.pdf)

**Manufacturing & CMC:**

Our cGMP clinical lot production has been successfully completed earlier in FY-22 and such material will be used in our upcoming Phase I/II human clinical trial for testing ORTHO-R in rotator cuff tear repair. The manufacturing batch will also provide sufficient material to support our meniscus tear repair preclinical program funded by a non-dilutive grant, expected to be initiated in FY-23 shortly after the commencement of our Phase I/II Rotator cuff repair trial.

**Regulatory:**

During FY-21, we received from the US FDA Office of Combination Products, the ORTHO-R product designation as a Drug/Biologics combination product.

**ORTHO R** has physicochemical interacting actions on various cell types and other PRP components, therefore supporting a Drug/Biologic combination product. The ORTHO-R reconstituted in PRP Drug/biologic implant is delivered through accessory Devices. The product’s jurisdictional assignment is to the FDA’s Center for Biologics Evaluation and Research (CBER). There are multiple merits of a Drug/Biologics therapeutic combination product. One of them is the ability to have a multiple mode of action label, related to the various interactions between our proprietary biopolymer and PRP, which may justify the scientific rationale behind the product’s therapeutic effect, and the generation of further intellectual property

**Clinical:**

The Phase I/II clinical trial status is as follows:

- Our Investigational New Drug (IND) application to the FDA was submitted on April 6, 2021 and granted on December 10, 2021.
- 10 US based clinical sites have been selected for the trial.
- 7 clinical sites have been fully contracted and the last 3 sites are currently completing their contract and budget negotiations.
- 7 sites have been initiated and are actively recruiting patients. We expect to initiate one more site before the end of Q2-23 and the last two sites in Q3-23.
- Patient screening and enrollment has begun, and we expect to randomize our first patients in Q2-23.
- Phase I part of the study is expected to be completed in Q3-23
- Completion of the Phase II recruitment is expected in Q4-23/Q1-24 depending on sites’ enrolment rate.
- Follow up and individual patient assessment and Phase II scoring will take place – 12 months after surgery.

**2. Leverage Polytechnique partnership to obtain non-dilutive grants to drive proof of concept in multiple potential indications**

**ORT’s has received\* and is seeking\*\* non-dilutive research grants through its partnership with Polytechnique**

Program	Development Stage	Indication	Details
<b>ORTHO-R</b>	Clinical Phase I/II	Rotator Cuff	Ortho-R is designated as a Drug/Biologic combination product by the FDA Office for Combination Products. The jurisdictional assignment for ORTHO-R is the Center for Biologics Evaluation and Research (CBER). A US IND was filed on April 6 <sup>th</sup> , 2022, with the FDA to obtain approval to initiate a 78 patient Phase I/II clinical trial to test Ortho-R in combination with PRP in the repair of rotator cuff tears as an adjunct to standard of care surgery, versus standard of care surgery alone. The IND was granted in December 2022. <i>See ORTHO-R Clinical Trial update below</i>
<b>ORTHO-M*</b>	Pre-Clinical	Meniscus	Testing the efficacy of ORTHO-M/PRP Drug-Biologic Implant formulation, for meniscus repair. Efficacy of our product has already been demonstrated in an animal proof of concept study. Our contracted research veterinarian expert, with the help of a major arthroscopic instrumentation company, have recently completed the development of surgical instruments tools, suitable to the sheep preclinical model. The next steps are to validate our model in large animal pilot and pivotal studies, starting in Q3-23. Human clinical trials would then follow. <b>\$500K grant obtained</b>

**Management’s Discussion and Analysis for the three months ended April 30, 2022**

*(In thousands of Canadian dollars, except for units, share and per share amounts)*

<b>ORTHO-V</b>	Feasibility	Osteoarthritis	Feasibility research on a freeze-dried biopolymer formulation combined with autologous biologics, tailored for intra-articular injections to provide the combined visco-biologics supplementation of articular joints and potentially gain disease modification outcomes in applications such as Osteoarthritis.
<b>ORTHO-T**</b>	Feasibility	Tendinopathy	Feasibility research on a freeze-dried biopolymer formulation combined with autologous biologics, tailored for intra-articular injections to provide the combined visco-biologics supplementation of articular joints and potentially help with tendon healing and regeneration. <b>\$4M grant being submitted in Q2-23 (Calendar)</b>

**3. Drive development of our proprietary platform beyond orthopedic applications by seeking R&D and/or development partners for each high potential application**

**Our Proprietary Technology Platform Can Be So Much More**

Considering the significant bioactivity and residency of our proprietary biopolymer – PRP implants, ORT continues to assess its potential for therapeutic uses outside of the rotator cuff/meniscus repair market.

The functionality of the chitosan framework could potentially be used in numerous other applications which could potentially address high unmet needs with profound clinical consequences.

We will also investigate combining ORT’s patented chitosan framework with targeted delivery of numerous autologous and synthetic therapeutics, either developed internally, licensed, or secured through strategic partnerships with biologic and/or pharma companies.

We will determine the highest value programs through consultation with our scientific and business advisory board and find R&D or development partners for the highest value projects

**4. Seek regulatory clearance in other high value jurisdictions**

ORT will seek regulatory clearances in Canada where the ORTHO-R product may be considered a medical device

ORT will seek advice on the regulatory pathway for our platform in Australia and Europe.

**Overall Value Proposition**

Drug/Biologic PRP Combination

**Technology Platform**

- Proprietary, novel, multi-indications, second generation, de-risked platform
- Strong intellectual property protection in three patent families
- Potentially addresses significant unmet medical need in large regenerative medicine market
- First solution to increase residence time to augment regeneration of new tissue
- Validated mode of action, safe and easy to use solution,
- Rapid coagulation and avoids shrinkage of implant, potentially adheres to multiple tissues
- Demonstrated efficacy in large animal model (decreased tendon gap & improved bone structure)

**ORTHO-R: Unique Drug / Biologics / Device Combination Product**

- In the US regulatory lead as the first PRP based drug/biologic product in human trials
- Target U.S. market first with clear regulatory pathway from FDA (IND to BLA)
- Potentially simpler regulatory pathways in major markets outside the US
- Inexpensive to manufacture
- Uses autologous PRP which can be sourced quickly and easily during surgery
- Lyophilized chitosan provides long shelf life

**Great Value Creation & Exit Potential**

- Phase I/II clinical trial initiated with first patients imminent.
- Multiple material milestones expected over next 12-24 months including completion of phase I/II clinical trial.
- NASDAQ listing to be considered for first half of 2023 calendar year
- Multiple regenerative medicine applications

## Ortho Regenerative Technologies Inc.

### Management's Discussion and Analysis for the three months ended April 30, 2022

(In thousands of Canadian dollars, except for units, share and per share amounts)

- Experienced management, Board and Clinical Advisory Board with history of value creation
- Low market valuation vs. industry peers
- Sufficient capital raised to start phase I/II study in rotator cuff indication

### Intellectual Property

ORT is the owner of 3 patent families. Our patent portfolio includes the following:

Family	Description	Patent Status
<u>No.1</u>	Clot-activated polymer composition for repairing the tissue of the subject, where the polymer composition adheres to the tissue and promotes cell proliferation, comprising platelet-rich plasma (PRP), a biopolymer, a salt, and a clot activator.	<ul style="list-style-type: none"><li>• Issued – Globally</li><li>• Expiry - 2030</li></ul>
<u>No.2:</u>	Freeze-dried polymer compositions for mixing with platelet rich plasma to form implants for tissue repair or compositions for therapeutic intra-articular injection.	<ul style="list-style-type: none"><li>• Issued – Globally</li><li>• Expiry - 2035</li></ul>
<u>No.3:</u>	Freeze-dried biopolymer scaffolds that form a hydrated microparticle dispersion after contact with blood or blood-derived fluids and stimulate anabolic wound repair processes, including angiogenesis, cell chemotaxis, tissue remodeling, and extracellular matrix.	<ul style="list-style-type: none"><li>• Issued/Allowance pending – Globally</li><li>• Expiry – 2035 / TBD</li></ul>

### Q1-2023 CORPORATE HIGHLIGHTS (February 1, 2022 to April 30, 2022)

- On March 14, 2022, Claude Leduc, CEO of Ortho announced his retirement. On the same date, the Corporation announced the hiring of Philippe Deschamps as its new President and CEO with Mr. Leduc agreeing to assist in the transition. Mr. Deschamps is a seasoned public company CEO focused on the healthcare market for the past 35 years and the last 20 years as CEO of 3 healthcare companies. Mr. Deschamps' most relevant experience was as co-founder of Helius Medical Technologies Inc. where he guided the company from the Canadian Securities Exchange to the NASDAQ and raised over a \$100M in the process. Mr. Deschamps' initial priorities will be to drive the advancement of the Ortho-R Phase I/II clinical trial for rotator cuff repair, uncover other potential uses for Ortho's core proprietary assets, and focus on investors relation activities in anticipation of the Corporation's upcoming clinical and corporate milestones.
- On April 5, 2022, the Corporation announced the closing of an oversubscribed non-brokered private placement of units for \$3.2 million (the "Private Placement"), with approximately \$560,000 of Insiders' subscriptions. The Company issued 16,000,000 Units at a price of \$0.20 per Unit for total gross proceeds of \$3.2 million of which an amount \$2.7 million was received in cash, an amount of \$0.2 million was issued as a replacement to convertible notes issued in December 2021 and the balance in compensation for accounts payable and accrued liabilities. Each Unit consists of one (1) Class A share of the Company (each, a "Common share") and one Common share purchase warrant (each a "Warrant"). Each Warrant will be exercisable into one (1) Share in the capital of the Company at the price of \$0.35 per Warrant Share for a period of 24 months from closing. If the closing price of the Shares is greater or equal to \$0.50 for ten (10) consecutive trading days, the Company may give notice to the Warrant holder, at any time after the statutory 4-month hold period, that it must exercise its remaining Warrants within a period of 30-days from the date of receipt of the notice, failing which the Warrants will automatically expire.

As a result of the closing of the Private Placement, Convertible Debentures bearing interest of 10% per annum and maturing on May 1, 2023 were amended such that their conversion price was reduced from \$0.30 to \$0.20 to match the purchase price of Units under this Private Placement. In addition, the exercise price of the 1,075,000 warrants and the 20,625 Finder's warrants issued on December 10, 2021 issued in connection with the Convertible Note Units financing were reduced from \$0.50 to \$0.35 to match the exercise price of the Warrants comprised in the Units sold under this Private Placement.

- On April 8, 2022 (the "Date of Grant") the Corporation granted 2,000,000 stock purchase options (the "Options") and 551,938 Restricted Stock Units ("RSU") to its newly hired CEO, Philippe Deschamps. Half of the Options and RSU's will vest annually and equally over the first 3 years following the Date of Grant. The balance of the Options and RSU's will vest based on achievements of predetermined operational and corporate milestones.
- On April 20, 2022, the Corporation created a wholly owned subsidiary in the United States called OR4102022 Inc. This subsidiary was created in the State of Delaware where business case law is most sophisticated. The subsidiary was also registered in Pennsylvania (PA) since the CEO, Philippe Deschamps, will operate the Corporation primarily from the US office located at 12 Penns Trail, Newtown in PA. The new subsidiary also became the sponsor of the ORTHO R Phase I/II clinical trial being performed in the US.

## Ortho Regenerative Technologies Inc.

### Management's Discussion and Analysis for the three months ended April 30, 2022

*(In thousands of Canadian dollars, except for units, share and per share amounts)*

#### Events Subsequent to the end of the quarter

- On May 1, 2022, the Corporation received a method and composition patent from the US Patent Office and received notice issue from Canada and European patent offices for the composition and method patents on one of its key patents for its freeze-dried polymer compositions for mixing with platelet rich plasma to form implants for tissue repair or compositions for therapeutic intra-articular injection.
- On May 4, 2022, the Corporation announced that the United States Patent and Trademark Office (the "USPTO") had issued a patent related to the Company's ORTHO-R soft tissue repair platform. The issued patent, titled, "Freeze-Dried Polymer Compositions for mixing with platelet rich plasma to form implants for tissue repair and/or composition for therapeutic intraarticular injection" (US Patent Application No. U.S. 11,285,100 B2) provides broad protection for both the composition and the method of use of our ORTHO R technology. New patent issued by USPTO to protect core IP until 2035 and positions the Corporation as leading player in the dynamic regenerative medicine market. The patent enables delivery of PRP in soft tissue repair surgery in a proprietary way.
- On May 19, 2022, the Corporation issued 500,000 warrants with an exercise price of \$0.35 per Common Share and expiring April 30, 2023 as compensation to non-related parties providing social media support and other corporate services.
- On May 26, 2022, the Corporation announced that it had received, through its partnership with Polytechnique Montreal, a \$0.5 million nondilutive grant from Axelys, to advance the development of its second technology platform indication, ORTHO-M, for meniscus repair.
- On June 13, 2022, the Corporation announced that patient recruitment for its Phase I/II Clinical trial for testing Ortho-R for rotator cuff repair had been initiated with six of the ten sites actively recruiting patients.

	Q1-23 vs Q1-22
<b>Revenues</b>	<ul style="list-style-type: none"> <li>• ORTI is a clinical stage company. There were no revenues generated during each of Q1-23 and Q1-22.</li> </ul>
<b>R&amp;D expenses</b>	<ul style="list-style-type: none"> <li>• R&amp;D expenses include internal and external expenses. Internal expenses represent mostly salaries and consulting fees for our staff. External expenses include all development costs related to work performed under our Collaborative R&amp;D contract with Polytechnique as well as specific manufacturing activities, regulatory, pre-clinical and clinical work to advance our pipeline. R&amp;D expenses are presented net of R&amp;D tax credits (ITCs) recoverable from the provincial government for Scientific Research and Experimental Development (SR&amp;ED) programs, and net of government grants.</li> <li>• R&amp;D expenses in Q1-23 increased over Q1-22 at \$663 compared to \$402, representing a 65% increase. During Q1-23, the Corporation increased its R&amp;D activities after receiving in Q4-22, the clearance by the FDA of its IND application to commence its Phase I/II clinical study for testing Ortho-R for rotator cuff repair. Such activities included mainly expenses related to prepare and activate all 10 US sites participating in the study. R&amp;D expenses also included site fees, and other auxiliary costs required to get the sites ready for enrollment and screening patients. In Q1-22, the R&amp;D costs include the finalization of the Clinical batch manufacturing and some pre-IND costs.</li> <li>• R&amp;D Costs are presented net of ITCs representing R&amp;D tax credits recovered from the provincial government for SR&amp;ED programs. ITCs accruals for Q1-23 were \$62 or 8% of R&amp;D costs, compared to \$\$33 and 8% for</li> </ul>

**Management’s Discussion and Analysis for the three months ended April 30, 2022**

*(In thousands of Canadian dollars, except for units, share and per share amounts)*

	<p>the Q1-22 period. The Corporation will favour Quebec based suppliers where possible in order to claim SR&amp;ED refundable credits and reduce the net costs of performing its R&amp;D programs.</p> <ul style="list-style-type: none"> <li>• During FY-22, the Corporation secured a \$75 grant for conducting its R&amp;D activities. The grant is to be amortized over the term of the 2-yr agreement. \$12 was recognized during Q1-23 compared to \$6 in Q1-22.</li> </ul>
<b>G&amp;A expenses</b>	<ul style="list-style-type: none"> <li>• G&amp;A expenses include salaries and consulting fees paid to non-R&amp;D staff, professional fees, conferences, travel expenses, as well as investors relation activities.</li> <li>• G&amp;A spending in Q1-23 increase over Q1-22 at \$567 compared to \$438 representing a 29% variance. The increase includes some additional charges to perform the year-end audit, as well as salary charges related to the addition of a new CEO, Phil Deschamps, and the cost of retaining the prior CEO during a transition period which ended at the end of Q1-23. The departing CEO will be receiving a severance to be paid over the coming year.</li> </ul>
<b>Share-based compensation (SBC)</b>	<ul style="list-style-type: none"> <li>• Represents the expense related to issuing stock options to staff, consultants and board members. Variances for the comparative quarters include non-recurrent grant to a new Board member as well contractual vesting for members of management on options already outstanding.</li> </ul>
<b>Financial expenses</b>	<ul style="list-style-type: none"> <li>• Financial expenses include interest on loans, non-convertible and convertible debentures, as well as effective interest on debentures as well as foreign exchange gain or loss.</li> <li>• Over the last year, the Corporation financed its operations via the issuance of interest-bearing instruments such as CDUs, NCDUs and ITC loans as opposed to equity. While such financial instruments do not lead to an immediate dilution in the total number of shares outstanding in the short term, they lead to increased interest charges.</li> <li>• Between October 2020 and April 2022, the Corporation has completed three separate CDU financings totalling \$3.2 million. Finally, the Corporation has secured a \$3.0 million non-convertible debenture in November 2020 as well as a \$1.1 million bridge financing in Q4-22. All these transactions have impacted the financial expenses.</li> <li>• A \$0.2 million portion of the December 2022 bridge financing was converted into the \$3.2 million Private Placement financing (“April 2022 PIPE”), thus reducing the financial expenses going forward.</li> <li>• Financial expenses have increased slightly in Q1-23 compared to Q1-22 at \$351 compared to \$339 representing a 4% increase. The increase is due to the new \$3 million NCDU financing secured in Q4-21, as well as the 3<sup>rd</sup> CDU financing secured in Q1-22 which was outstanding for the full quarter in Q1-23 compared to only a few weeks in Q1-22.</li> <li>• The increase in financial expenses for Q1-23 include a \$24 gain on foreign exchange transactions, as compared to a \$38 loss for Q1-22.</li> </ul>
<b>Fair Value of Embedded Derivative</b>	<ul style="list-style-type: none"> <li>• On July 19, 2022, the Corporation announced the amendment of three series of CDUs to extend their respective maturity dates. (See “Balance Sheet Highlights” for more details).</li> <li>• An Embedded derivative comprised of the conversion options classified as liability was created following the amendment of the CDUs. Starting Q4-22, any change in the Fair Value of the Conversion Option of the CDUs (“FVCO”) has to be recorded as a financial expense.</li> <li>• During Q1-23, the change in the FVCO, led to a gain of \$0.7 million. There was no FVCO adjustments required for Q1-22 considering the embedded derivative was created in Q3-22.</li> <li>• The change in FVCO recorded in Q1-23 was mainly due to 1) the change in share price between the end of Q4-22 and Q1-23, as well as 2) the change in the conversion price of the CDUs which was triggered by the terms of the April 2022 PIPE. As a result of the April 2023 PIPE, the conversion price of all 3 series of CDUs maturing May 1, 2023 has been reduced from \$0.30 to \$0.20.</li> </ul>
<b>Fair Value adjustments on warrants</b>	<ul style="list-style-type: none"> <li>• The terms of the warrants issued as part of the December 2022 Bridge financing led to the creation of a warrant liability (“FVAW”). Until the warrants are exercised or expire, a fair value adjustment to the warrants will be recorded quarterly to reflect the change in the warrant liability.</li> <li>• During Q1-23, the Corporation recorded a gain on revaluation of their related Warrants’ fair value of \$39. This adjustment mainly results from the decrease in the Corporation’s share price between the end of Q4-22 and Q1-23 net of the impact of the exercise price amendment that took place as a result of the April 2023 PIPE. (See note 11a to our Q1-23 Financial Statements).</li> </ul>
<b>Net Loss for the period.</b>	<ul style="list-style-type: none"> <li>• Net loss decreased by 32% between Q1-22 and Q1-23 at \$0.85 million compared to \$1,2 million. The \$0.4 million decrease in net loss was primarily due to the \$0.8 million combined gain of revaluation of the CDU embedded derivative and warrant liability, which more than offset the increase in R&amp;D and G&amp;A expenses for the quarter.</li> </ul>
<b>EBITDA (L)</b>	<ul style="list-style-type: none"> <li>• Management believes that our EBITDA (L) performance is more indicative of our operating results as it eliminates the financial costs associated with our financial structure such as CDUs and NCDA financings, and ITC financings as well as depreciation and the amortization of intangible assets.</li> </ul>

**Management’s Discussion and Analysis for the three months ended April 30, 2022**

(In thousands of Canadian dollars, except for units, share and per share amounts)

	<ul style="list-style-type: none"> <li>After eliminating the impact of the financial expenses, as well as depreciation, and amortization, but also after eliminating the impact of the combined gain on revaluation of the CDU embedded derivative and warrant liability, our EBITDA loss during Q1-23 was \$1.3 million compared to \$0.9 million for Q1-22, representing a 41% increase.</li> </ul>
--	---

**Selected Balance Sheet Highlights**

The following table sets forth the financial information related to the Corporation’s statements of financial position for the periods indicated and should be read in conjunction with the unaudited financial statements for quarter ended April 30, 2022.

As at,	April 30, 2022	31-Jan-21	Change	
	\$	\$	\$ <sup>1</sup>	% <sup>2</sup>
Cash	2,190	313	1,877	600%
Prepays and deposits	131	120	11	9%
Intangible Assets	324	332	-8	-2%
Total assets	3,015	1,123	1,892	168%
Trade accounts payable and accrued liabilities	1,078	607	471	78%
Convertible notes	766	934	-168	100%
Convertible Debentures	2,454	2,387	67	3%
Non-Convertible Debentures	2,421	2,349	72	3%
Warrants classified as liability	100	139	-39	100%
Embedded derivative	848	1,582	-734	100%
Total liabilities	7,842	8,227	-385	-5%
Common shares	10,455	7,891	2,564	32%
Warrants	2,293	1,828	465	25%
Contributed surplus	2,202	2,104	98	5%
Deficit	(19,777)	(18,927)	-850	4%

- A positive variance represents a positive impact to our balance sheet and a negative variance represents a negative impact to our balance sheet.
- Percentage change is presented in relative values
- The comparative figures of the statement of financial position were restated to reflect a correction to the current portion of the convertible debentures as at January 31, 2022, by reclassifying an amount of \$1,848 from long-term liabilities to current liabilities.

Selected items	Q1-23 vs YE-22
<b>Cash</b>	<ul style="list-style-type: none"> <li>Cash at the end of Q1-23 was \$2.2 million compared to \$0.3 million at the start of the fiscal year. The increase in cash takes into consideration the net impact of the April 2022 PIPE, which generated gross proceeds of \$3.2 million and net proceeds of \$2.7 million less liquidities required to fund operations during the quarter.</li> </ul>
<b>Prepays and deposits</b>	<ul style="list-style-type: none"> <li>No material change since year-end 2022.</li> </ul>
<b>Intangible Asset</b>	<ul style="list-style-type: none"> <li>Intangible assets reflect the net book value of our patents and biopolymer technology acquired from Polyvalor. The nominal reduction between YE-22 and Q1-23 results from amortization charges which were not offset by new investments.</li> </ul>
<b>Total assets</b>	<ul style="list-style-type: none"> <li>The decrease in cash during the quarter led to a 168% increase in our total assets between the end of FY-22 and Q1-23.</li> </ul>
<b>Trade payables and accrued liabilities</b>	<ul style="list-style-type: none"> <li>Trade accounts payables and accrued liabilities have increased by \$0.5 million during Q1-23 following the increase in R&amp;D activities that took place during the quarter.</li> </ul>
<b>Convertible Notes</b>	<ul style="list-style-type: none"> <li>Convertible notes were issued as part of the bridge financing announced December 2022. \$0.2 million of these notes have been converted into the April 2022 PIPE (See “Subsequent events”). Unless previously converted, the balance is due at maturity in December 2022. The reduction since the start of the fiscal year takes into consideration the \$0.2 million of notes converted into the April 2022 PIPE, as well as accretion expense for the period.</li> </ul>
<b>Convertible debentures units (CDU)</b>	<ul style="list-style-type: none"> <li>Between October 2019 and April 2020, the Corporation issued \$3,204 worth of CDUs to fund its operations including a first closing of \$1,644 on October 8, 2019, a second closing of \$500 on December 30, 2019, and a third closing of \$1,060 on April 21, 2020.</li> <li>The nominal increase between the end of FY-22 and Q1-23 represents accretion expense of \$0.1 million.</li> </ul>

Management’s Discussion and Analysis for the three months ended April 30, 2022

(In thousands of Canadian dollars, except for units, share and per share amounts)

<b>Non-convertible Debentures (NCDU)</b>	<ul style="list-style-type: none"> <li>During Q4-21 the Corporation secured a \$3,000 NCDU financing that enabled the repayment of ITC loans and increased the Corporation’s liquidities. The increase of \$0.1 million between YE-22 and Q1-23 represents accretion expense for the Q1-23 period.</li> </ul>
<b>Warrants classified as liability</b>	<ul style="list-style-type: none"> <li>This item represents the \$0.1 million Fair Value of the warrants issued as part of the December 2022 bridge financing less the gain on reevaluation of the warrants between the date of issuance and Q1-23. (See “Financial Statements - note 11b”).</li> </ul>
<b>Embedded Derivative</b>	<ul style="list-style-type: none"> <li>In July 2022, a \$1.2 million embedded derivative representing the related conversion options was created following the amendment of the CDUs.</li> <li>Any change in the Fair Value of the Conversion Option of the CDUs (“FVCO”) is recorded as a financial expense in the statements of loss, as a gain or loss on embedded derivative related to CDUs.</li> <li>Changes to the FVCO takes place based on the following 3 scenarios: 1) reduction of the FVCO following quarterly re-evaluation of the FVCO; 2) exercise of the conversion option by the holder; and 3) repayment or maturity.</li> <li>During Q1-23, the FVCO decreased by \$0.7 million. The change in FVCO takes into account the revaluation that took place as a result of the terms of the April 22 PIPE which led to a reduction of the conversion price of the CDU.</li> </ul>
<b>Total Liabilities</b>	<ul style="list-style-type: none"> <li>Total liabilities have decreased between YE-22 and Q1-23. The \$0.5 million variation included a \$0.5 million increase in payables and accrued liability but offset by the \$0.2 million reduction of Convertible notes issued in December 2022, and the combined \$0.8 million gain on revaluation of the warrant liability and CDU embedded derivative.</li> </ul>
<b>Common Shares</b>	<ul style="list-style-type: none"> <li>Common shares have increase by \$2.6 million mainly as a result of the April 2022 PIPE net of share issue costs.</li> </ul>
<b>Warrants</b>	<ul style="list-style-type: none"> <li>Warrants increased by \$0.5 million mainly as a result of the warrants issued as part of the April 2022 PIPE net of the allocation of share issue costs, less the impact of expired warrants.</li> </ul>
<b>Contributed Surplus</b>	<ul style="list-style-type: none"> <li>The contributed surplus increased by \$0.1 million as a result of share-based compensation expense and the expiry of warrants.</li> </ul>
<b>Deficit</b>	<ul style="list-style-type: none"> <li>Increase reflects the performance of the Corporation during Q1-23. (See “Statement of Loss” commentaries)</li> </ul>

SELECTED QUARTERLY FINANCIAL INFORMATION

The following table sets out the Corporation’s selected unaudited quarterly financial information for the eight quarters ended April 30, 2022. This information is derived from unaudited quarterly financial statements prepared by management in accordance with IFRS. The following quarterly information is presented on the same basis as the audited financial statements and should be read in conjunction with those statements and their accompanying notes.

	Q1-23	Q4-22	Q3-22	Q2-22	Q1-22	Q4-21	Q3-21	Q2-21
R&D Expenses (Net)	663	415	591	141	402	390	191	195
G&A expenses	567	309	357	367	438	472	342	186
Share-based compensation	42	67	43	64	63	112	101	49
Financial expenses (income)	351	370	266	332	339	294	179	201
Fair Value adjustment embedded derivative	(734)	(279)	667	-	-	-	-	-
Fair Value adjustment on warrants	(39)	(31)	-	-	-	-	-	-
Net Loss	(850)	(851)	(1,924)	(904)	(1,242)	(1,268)	(813)	(631)
Loss per share (Basic and diluted):	(0.02)	(0.02)	(0.06)	(0.03)	(0.04)	(0.04)	(0.03)	(0.03)
EBITDA (Loss)	(1,254)	(773)	(973)	(413)	(888)	(955)	(611)	(413)

(See “Management’s Responsibility for Financial Reporting” – “Non-IFRS Financial Measures”)

Notes	Valuable information
<b>R&amp;D expenses (Net of ITCs and grants)</b>	<ul style="list-style-type: none"> <li>Net R&amp;D expenses increased 60% over the prior Q4-22 quarter. R&amp;D activities have accelerated in Q1-23 following the IND grant received by the FDA in Q4-22 to commence the Phase I/II trial for testing Ortho-R for rotator cuff repair. R&amp;D expenses in Q1-22 and Q4-22 picked up over prior quarters as the Corporation performed its CMC batch manufacturing.</li> </ul>
<b>G&amp;A expenses</b>	<ul style="list-style-type: none"> <li>G&amp;A expenses have increased in Q1-23 compared to the prior quarter and reflected the impact of senior management changes that took place during the quarter. IR activities also increased during the quarter and contributed to the closing of the April 2022 PIPE. Other expenses, such as rent, insurance, and office expenses, have been relatively stable and had no significant impact on the overall spending. We expect G&amp;A to be stable for the coming quarters.</li> </ul>

Management’s Discussion and Analysis for the three months ended April 30, 2022

(In thousands of Canadian dollars, except for units, share and per share amounts)

<b>Share-Based Compensation</b>	<ul style="list-style-type: none"> <li>Share-based compensation fluctuates as a results of staff changes, and due to the timing of expense recognition associated with the vesting of the options issued.</li> </ul>
<b>Financial expenses</b>	<ul style="list-style-type: none"> <li>Financial expenses have increased starting Q4-21 following the implementation of the \$3.0 million NCDU.</li> <li>Q1-23 financial expenses were slightly lower than Q4-22 due to FX gains recorder during the quarter.</li> <li>The increase in Q4-22 related to the issuance of Convertible Notes as part of the December 2021 Bridge Financing – \$0.2 million of which has been converted into the April 2022 private placement.</li> <li>Interest charges on the CDUs may go down over time as CDU holders opt to convert their debenture prior to maturity.</li> <li>ITC loans have been repaid in Q4-21.</li> </ul>
<b>FV adjustment of embedded derivative</b>	<ul style="list-style-type: none"> <li>The changes to the terms of the CDU conversion price as well as the variation in share price during the last quarters has led to respective changes in the Fair Value of the Conversion Option of the CDUs (“FVCO”) representing \$0.7 million decrease in Q1-23, \$0.3 million decrease in Q4-22 and \$0.7 million increase in Q3-22. There was no embedded derivative prior to Q3-22.</li> </ul>
<b>Fair Value adjustments on warrants</b>	<ul style="list-style-type: none"> <li>The Fair value adjustments to the warrants (“FVAW”) issued as part of the December 2021 bridge financing was recorded as a liability in Q4-22 (See “Balance Sheet section”).</li> <li>Going forward the change in FV between the end of each quarter will be recorded as a gain or expense quarterly going forward until the warrants are exercised or expired.</li> <li>The change in FVAW led to a nominal gain for each of Q4-22, and Q1-23.</li> </ul>
<b>Net loss</b>	<ul style="list-style-type: none"> <li>Net loss in Q1-23 was similar as Q4-22 as the increase in R&amp;D and G&amp;A was offset by the combined gain revaluation of the FVCO and FVAW.</li> <li>Net loss in Q4-21 increased slightly compared to prior quarter due to the relatively nominal variation in G&amp;A and R&amp;D spending. The Increase in financial expenses between Q4-21 and Q1-23 was offset by the decrease in SBC expenses.</li> <li>Going forward ORTI net loss will be mainly driven by the level of R&amp;D spending made to advance its R&amp;D programs (Ortho-R, Ortho-M, and Ortho-C) as well as the financial expenses related to its capital structure.</li> </ul>
<b>EBITDA (Loss)</b>	<ul style="list-style-type: none"> <li>EBITDA (Loss) (See “Management’s Responsibility for Financial Reporting” – “Non-IFRS Financial Measures”) eliminates the impact of the CDU, NCDU, ITC and other financings which reflect the Corporation’s financing strategy adopted to attract the required capital to fund its operations.</li> <li>After eliminating such expenses, the EBITDA (Loss) in Q1-23 increased over Q4-22 as R&amp;D activities picked up following the IND grant in December 2022. Fluctuations over prior quarter were directly related to variations in R&amp;D and G&amp;A spendings described above.</li> </ul>

LIQUIDITIES AND CAPITAL RESSOURCES

For the quarter ended on,	30-Apr-22	30-Apr-21	Change	
			\$ <sup>1</sup>	% <sup>2</sup>
<b>Operating activities:</b>				
Net loss from operations	(850)	(1,242)	392	-32%
Other items not affecting cash	(270)	297	(567)	-191%
Changes in non-cash working capital	399	124	275	222%
Cash used in operations	(721)	(821)	100	-12%
<b>Investing activities:</b>				
Cash used in investing activities	-	(32)	32	100%

			\$ <sup>1</sup>	% <sup>2</sup>
Cash	2,190	313	1,877	600%
Total current assets	2,629	722	1,907	264%
Accounts payables and accrued liabilities	1,078	607	471	78%
Convertible Notes	766	934	(168)	100%
Warrants presented as a liability	100	139	(39)	100%
Total current liabilities	2,079	1,869	210	11%
Working Capital	550	(1,147)	1,697	-148%

1. A positive variance represents a positive impact and a negative variance represents a negative impact
2. Percentage change is presented in relative values

Cash at the end of Q1-23 was \$2.2 million as compared to \$0.3 million at the end of YE-22 representing a \$1.9 million increase. During Q1-23, working capital also improved by a similar amount with a \$1.7 million increase.

The Corporation will continue to use its liquidities to fund its operations including its primary objective of advancing its first Phase I/II human trial on Ortho-R for rotator cuff repair. Following delays in FY-22 due to our interaction with the FDA, the Corporation now expects to meet important corporate milestone in FY-23 with Phase I/II trial activities now picking up. The Corporation is also assessing various scenarios for addressing the maturity of the remaining \$0.8 million convertible notes due in Q4-23.

During prior periods, the Corporation has demonstrated its ability to raise the necessary capital to support its operations and achieve development milestones. However, there is no assurance that the Corporation will be able to secure the necessary financing to fund its various development programs. Management has continued to implement IR and financing initiatives to attract the required capital to fund its operations and deliver R&D and corporate milestones as demonstrated by the \$3.2 million April 2022 PIPE financing. ORT has adequate financial resources to start implementing its Ortho-R rotator cuff tear repair clinical program in FY-23. (See “Overview of the Business” and “Going concern”).

**Future financing**

As of April 30, 2022, ORTI had 33.8 million warrants outstanding with an average exercise price of \$0.42. 32.7 million warrants are subject to an acceleration clause. 16 million warrants issued as part of the April 2022 PIPE can be accelerated if the average VWAP of the Corporation’s shares over any ten (10) consecutive trading days (the “Trading Period”) is greater or equal to \$0.50 (the “Accelerator price”), the Corporation may give notice to the warrant holder that it must exercise its remaining warrants within a period of 30 days from the date of receipt of the notice, failing which the warrants will automatically expire. Same applies for 16.7 million warrants with an accelerator price of \$1.00 but will require a 20-day trading period.

The extent to which these warrants are exercised will be a function of the market price of the Corporation’s underlying common shares and investors’ view of the opportunity for shareholder value creation over the investment time for each individual investor. If the acceleration clause had been exercised for all warrants outstanding at the end of Q1-23 and for which the acceleration clause applied, the maximum influx of cash to the Corporation would have been approximately \$13.9 million. Assuming all warrants are exercised prior to their maturity a total of \$14.2 million could be raised.

## Ortho Regenerative Technologies Inc.

### Management's Discussion and Analysis for the three months ended April 30, 2022

(In thousands of Canadian dollars, except for units, share and per share amounts)

The Corporation's use of available funds over the coming year is of utmost concern to the Board. Since the extent and timing of warrant exercise as a source of financing are uncertain, management continues to look for alternative sources of financing to secure the required capital necessary to fund its operations and development projects. Management's focus is on securing equity-based financings from Canadian and US based institutional and/or accredited investors. The Corporation is also actively promoting its technologies to strategic partners.

#### Discussion of operating cash requirements

All programs in the Corporation's current portfolio will require a significant investment to increase their market value (through, for example, clinical trials) or to attract a strategic partner. We estimate that \$30 million will be required to bring our rotator cuff (Ortho-R), meniscus (Ortho-M), and cartilage (Ortho-C) programs to market. There are several areas where duplication between programs can provide savings such as the manufacture of the chitosan material, which is common across our product platform. We therefore do not need to replicate several manufacturing activities, or some associated costs, for each of the projects.

Ortho-R for the repair of rotator cuff tears is a clinical development stage program and represents our lead product for commercialization. We currently estimate that an additional investment of at least \$5 million will be required to provide proof of concept in human and another \$10 million to bring the same program to commercialization.

Ortho-M (meniscus) is the Corporation's second candidate and is also in a development phase. Proof of efficacy in a large animal preclinical model is expected to take place in the coming fiscal year. Ortho-M's development pathway and plan will be similar to Ortho-R and will benefit from all cGMP activities performed on scaling-up Ortho-R. Consequently, management estimates that \$1.5 million will be required prior to submitting an IND application prior to testing Ortho-M in human for meniscus tear repair. However, the Corporation has recently announced receiving a \$0.5 million grant specific to the development of Ortho-M. This grant will cover 80% of the costs associated with the initial R&D activities related to this program and should lead to completion of pre-IND activities in FY-24.

Ortho-C and Ortho-V are currently at earlier stage of development and management does not intend to commit any sums to the advancement of these projects until its successfully advances Ortho-R and Ortho-M in human clinical testing.

In order to successfully advance its current R&D programs, ORTI entered on into a Collaborative R&D Agreement with Polytechnique on June 19, 2015 to ensure access to Polytechnique's staff, expertise and laboratories. The agreement was amended in 2018 to extend the term up to August 15, 2022. An additional 3-year extension is currently under negotiation.

#### Statement of Compliance

The unaudited interim financial statements included in this MD&A for the quarter ending April 30, 2022 have been prepared in accordance with *International Financial Reporting Standards* as issued by the *International Accounting Standards Board ("IASB")* as well as with those standards and interpretations as issued by the *International Financial Reporting Interpretations Committee ("IFRIC")* issued and effective or issued and early adopted as at the time of preparing these interim financial statements.

#### Use of Estimates and Judgements

Reference should be made to the Corporation's 2022 annual financial statements, *note 3*, for an extended description of the information concerning the Corporation's significant judgments, estimates and assumptions that have the most significant effect on the recognition and measurement of assets, liabilities, income and expenses.

## Notes to Interim Financial Statements

*In thousands of Canadian dollars except for share and per share amounts*

### 1. Presentation of Financial Statements

#### Description of the Business and Going Concern Uncertainty

Ortho Regenerative Technologies Inc. ("the Corporation", or "Ortho") was incorporated under the Canada Business Corporations Act on February 5, 2015. The Corporation's head office, principal address and registered office is located at 16667 Hymus Blvd., Kirkland, Quebec, Canada. Since October 10, 2017, the Corporation's shares have been listed on the Canadian Securities Exchange ("CSE"), under the symbol "ORTH". The Corporation also trades on the United States OTCQB market under the symbol "ORTIF".

The Corporation is an emerging Orthopaedic and Sports Medicine biologics company dedicated to the development of novel therapeutic soft tissue repair technologies to dramatically improve the success rate of orthopaedic and sports medicine surgeries. The Corporation's proprietary biopolymer has been specifically designed to increase the healing rates of occupational and sports related injuries to tendons, ligaments, meniscus, and cartilage. The biopolymer – autologous PRP combination implant, can be directly placed into the site of injuries by surgeons during routine operative procedures without significantly extending the duration of surgeries and without further interventions. Considering the significant bioactivity and residency of our proprietary biopolymer – PRP implants, Ortho RTi continues to assess its potential for therapeutic uses outside of the soft tissue repair market.

These unaudited interim condensed financial statements have been prepared on the going concern basis, which presumes the Corporation will continue its operations for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations. In its assessment to determine if the going concern assumption is appropriate, management considers all data available regarding the future for at least, without limiting to, the next twelve months.

The Corporation has yet to generate revenue and has relied upon the issuance of debt and equity instruments to fund its operations. During the three-month period ended April 30, 2022, the Corporation incurred a net loss of \$850 and used cash in operations of \$721. As at April 30, 2022 the Corporation had a working capital balance of \$550.

The ability of the Corporation to fulfill its obligations and finance its future activities depends on its ability to raise capital and on the continuous support of its creditors. The Corporation believes its efforts to raise sufficient funds to support its activities will be successful, however, there is no assurance that funds will continue to be raised on acceptable terms. This indicates the existence of a material uncertainty that may cast a significant doubt about the ability of the Corporation to continue as a going concern without obtaining additional financial resources.

Failure to obtain such additional financing could result in delay or indefinite postponement of the Corporation's strategic goals. These unaudited interim condensed financial statements do not include any adjustments to the amounts and classification of assets and liabilities that would be necessary should the Corporation be unable to continue as a going concern. Such adjustments could be material.

These unaudited interim condensed financial statements were approved and authorized for issuance by the Board of Directors on June 20, 2022.

### 2. Summary of Significant Accounting Policies

#### Basis of measurement

These unaudited interim condensed financial statements have been prepared on a historical cost basis, except for the revaluation of certain financial assets and financial liabilities to fair value.

#### Functional and presentation currency

These unaudited interim condensed financial statements are presented in Canadian dollars, which is also the functional currency of the Corporation.

Transactions denominated in foreign currencies are initially recorded in the functional currency of the related entity using the exchange rates in effect at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated using the closing exchange rates. Any resulting exchange difference is recognized in the statement of loss and comprehensive loss. Non-monetary assets and liabilities denominated in foreign currencies and measured at historical cost are translated using historical exchange rates, and those measured at fair value are translated using the exchange rate in effect at the date the fair value is determined. Expenses are translated using the average exchange rates for the period or the exchange rate at the date of the transaction for significant items.

	April 30, 2022	January 31, 2022
End of period exchange rate – USD	1.2792	1.2719
Period average exchange rate – USD	1.2667	1.2528

## Notes to Interim Financial Statements

In thousands of Canadian dollars except for share and per share amounts

### Statement of Compliance

These unaudited interim condensed financial statements of the Corporation have been prepared in accordance with International Financial Reporting Standards (“IFRS”). These financial statements have been prepared in accordance with those IFRS standards and International Financial Reporting Interpretations Committee (“IFRIC”) interpretations issued and effective or issued as at the time of preparing these unaudited interim condensed financial statements. The policies set out below have been consistently applied to all the periods presented.

The preparation of the Corporation’s unaudited interim condensed financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

### 3. Use of Estimates and Judgment

The preparation of the unaudited interim condensed financial statements requires management to undertake several judgements, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses. The actual results may differ from these judgements and estimates. These estimates and judgements are based on management’s best knowledge of the events or circumstances and actions the Corporation may take in the future. The estimates are reviewed on an ongoing basis. Information about the significant judgements, estimates and assumptions that have the most significant effect on the recognition and measurement of assets, liabilities, income and expenses are discussed in Note 3 of the Corporation’s 2022 annual financial statements and are still applicable During the three months ended April 30, 2022.

### 4. Equipment

	Cost	Accumulated depreciation	Carrying Value
<b>Balance as at January 31, 2022</b>	271	(202)	69

<b>Balance as at April 30, 2022</b>	<b>485</b>	<b>(161)</b>	<b>324</b>

### 6. Accounts Payable and Accrued Liabilities

Balance as at	April 30, 2022	January 31, 2022
Trade accounts payable	890	466
Accrued liabilities	188	141
	<b>1,078</b>	<b>607</b>

### 7. Long-Term Loan

	Interest Rate	Maturity	April 30, 2022	January 31, 2022
Canada Emergency Business Account	Interest-free	December 31, 2023	40	40

On April 29, 2020, the Corporation received a government loan under the Canada Emergency Response Benefit (“CERB”), part of Canada’s COVID-19 economic response plan. The loan bears no interest and has a maturity date of December 31, 2023. Upon repayment of the loan at or prior to its maturity on December 31, 2023, the Corporation would receive a grant of \$10 to reduce the balance repayable.

### 8. Convertible Debentures

#### a) Host instrument

	Three months ended April 30, 2022	Year ended January 31, 2022
Opening balance	2,387	2,476
Accretion expense	67	346
Conversion of debentures into common shares	-	(47)
Remeasurement resulting from extension of convertible debentures' maturities	-	(388)
<b>Total</b>	<b>2,454</b>	<b>2,387</b>
Short-term	-	-
Long-term	2,454	2,387
<b>Total</b>	<b>2,454</b>	<b>2,387</b>

The following table shows the nominal value of the convertible debentures with their maturity date:

Maturity Date	Initial Amount	Nominal amounts outstanding as at	
		April 30, 2022	January 31, 2022
May 1, 2023	3,204	2,783	2,783
<b>Total</b>	<b>3,204</b>	<b>2,783</b>	<b>2,783</b>
Short-term		-	-
Long-term		2,783	2,783
<b>Total</b>		<b>2,783</b>	<b>2,783</b>

On April 21, 2020, the Corporation completed a non-brokered private placement for \$1,060 worth of unsecured convertible debentures at a price of \$1 (one thousand) per debenture, on same terms as the unsecured convertible debentures issued on October 8, 2019, and December 30, 2019 for \$1,644 and 500 respectively. The debentures bear interest at a rate of 10% per annum with a term of 2 years. The debentures are convertible at a price per Class A common shares of \$0.30, in whole or in part, at the option of the holder at any time prior to the close of business on the last business day immediately preceding the maturity date. Each debenture unit consisted of one \$1 (\$ one thousand) principal amount unsecured convertible debenture and 2,000 share purchase warrants, each exercisable into one common share of the Corporation at \$0.50 per share two years from issuance.

In the event that the average VWAP over any twenty (20) consecutive trading days is greater or equal to \$1.00, the Corporation may give notice to the warrant holder that it must exercise its remaining warrants within a period of 30 days from the date of receipt of the notice, failing which the warrants will automatically expire. The "average VWAP" is the average of the volume weighted average market prices of the Corporation's Class "A" Shares on a single day. Long-term loans of \$302 as at January 31, 2020 were converted as part of the closing of April 21, 2020 (\$914 of loans payable were converted into convertible debenture units issued on October 8, 2019).

At creation, the Corporation valued the debt component of the debentures by calculating the present value of the principal and interest payments, discounted at a rate of 27.5%, being management's best estimate of the rate that a non-convertible debenture with similar terms would bear as at April 21, 2020. The equity component consists of the warrants and the conversion option. The values attributed to each were based on the relative fair value approach. On initial recognition, the liability components were \$801, the warrants were \$124 and the conversion options were \$135.

In connection with the issuance of convertible debenture units, 27,067 compensation warrants were issued. Each compensation warrant is exercisable into one common share of the Corporation at \$0.50 per share 18 months from issuance.

On July 19, 2021, the Corporation amended its convertible debentures and related warrants agreements (the "Amendment"). Under the terms of the Amendment, the maturity date of all outstanding convertible debentures and related unexercised warrants was extended to May 1, 2023 and certain of the conversion features were clarified.

The Amendment was accounted for as an extinguishment of all outstanding debentures as the change in the fair value before and after the Amendment exceeded 10% of the carrying amount of the debentures. Accordingly, the Corporation recorded a loss on extinguishment of the debentures in the amount of \$26 in the second quarter of fiscal year 2022.

# Ortho Regenerative Technologies Inc.

## Notes to Interim Financial Statements

In thousands of Canadian dollars except for share and per share amounts

At that date of the Amendment, the Corporation derecognized the carrying amount of the outstanding convertible debentures of \$2,651 and a new liability totaling \$2,262 was recorded by using the discounted cash flows method assuming an effective interest determined on the estimated rate for a loan with similar terms from comparable companies, but without a conversion feature. The difference between both amounts was recorded as decrease of deficit \$389. Resulting from the clarification of the conversion option features, the Corporation determined that the conversion option was now considered as an embedded derivative to be classified as a liability instrument. Therefore, the Corporation derecognized the \$460 carrying amount of the conversion option initially classified as an equity component and recorded the fair value of \$1,194 as a liability. The difference between both amounts was recorded as an increase of deficit of \$734. The Corporation utilized a Monte Carlo simulation model to determine the fair value of the conversion option.

Accretion charges, included in financing expense on the statement of loss and comprehensive loss, attributable to the debentures During the three months ended April 30, 2022 was \$67 (\$99 During the three months ended April 30, 2021). In addition, \$68 of interest expense was recorded, of which \$42 is included as Interest payable on debentures in the statement of financial position.

During the three months ended April 30, 2022, no debentures (\$47 for the year ended January 31, 2022) were converted into common shares of the Corporation.

### b) Embedded Derivative

	Three months ended April 30, 2022	Year ended January 31, 2022
Opening balance – July 19, 2021	1,582	1,194
Fair Value adjustment	(734)	388
<b>Total</b>	<b>848</b>	<b>1,582</b>

During the three months ended April 30, 2022, the Corporation recorded a gain on revaluation of their related embedded derivative's fair value of \$734. This adjustment mainly results from the decrease in the Corporation's share price going down from \$0.35/share on January 31, 2022 to \$0.24/share as of April 30, 2022, net of the impact of the conversion price amendment discussed in Note 11.

### 9. Non-convertible Debentures

	Three months ended April 30, 2022	Year ended January 31, 2022
Opening balance	2,349	2,099
Additions	-	-
Fair value of warrants allocated to equity	-	-
Transaction costs	-	-
Accretion expense	72	250
<b>Total</b>	<b>2,421</b>	<b>2,349</b>
Short-term	-	-
Long-term	2,421	2,349
	<b>2,421</b>	<b>2,349</b>

On November 30, 2020, the Corporation issued 3,000 secured non-convertible debenture units (the "Debenture Units") at a purchase price of \$1 per Debenture Unit for gross proceeds of \$3,000, of which an amount of \$55 was in exchange of consultants' remuneration. These units are secured by a \$4,000 hypothec against the universality of the Corporation's present and future assets. Each Unit consists of one 10% secured non-convertible debenture of the Corporation in the principal amount of \$1 (each, a "Debenture") and 500 Class "A" share purchase warrants (each, a "Warrant") both maturing November 30, 2023 (the "Maturity Date"). Each Warrant entitles the holder thereof to purchase one Class "A" Share of the Corporation (each, a "Share") at an exercise price of \$0.75 until the Maturity Date.

The Corporation valued the debt component of the non-convertible debentures by calculating the present value of the principal and interest payments, discounted at a rate of 25%, being management's best estimate of the rate that a non-convertible debenture without warrant coverage would bear as at November 30, 2020. On initial recognition, the liability components were \$2,272, and the warrants were \$728. In connection with the transaction, 170,850 broker's warrants were issued. Transaction costs of \$209 were netted against the liability and will be amortized using the effective interest method over the period of the loan. A further \$67 in transaction costs, related to the warrants, were capitalized to share issue costs.

# Ortho Regenerative Technologies Inc.

## Notes to Interim Financial Statements

In thousands of Canadian dollars except for share and per share amounts

Accretion expense included in financing expense on the statement of loss and comprehensive loss, attributable to the debentures During the three months ended April 30, 2022 was \$73 including \$15 of amortization of transaction costs (\$56 During the three months ended April 30, 2021). In addition, \$75 of interest expense was recorded (\$75 During the three months ended April 30, 2021), of which \$50 is still accrued and included in accrued interest on debentures in the statement of financial position.

The following table shows the nominal value of the non-convertible debentures with their maturity date:

Maturity Date	Initial Amount	Nominal amounts outstanding as at	
		April 30, 2022	January 31, 2022

On December 13, 2021, the Corporation announced the closing of a non-brokered private placement offering (the "Private Placement") where it issued 1,075 unsecured Convertible Note Units at a price of \$0.975 per Convertible Note Unit for total gross proceeds of \$1,048. Each Convertible Note Unit consists of one (1) unsecured convertible note (each a "Note") of the Company in the principal amount of \$1,000 and 1,000 Class "A" common share purchase warrants (each a "Warrant"). The Notes bear interest at a rate of 10% per annum from the date of issue, payable in cash, semi-annually in arrears and will mature (the "Maturity Date") on the earlier of (i) 12 months following the closing date of the Private Placement, or (ii) 20 days following the closing of a capital raise in the form of an equity or debt financing of at least \$5,000 (the "Capital Raise"). Any unpaid interest payments will accrue and be added to the principal amount of the Notes. Should the Company complete a Capital Raise prior to the Maturity Date, the holder of a Note will have the option, but not the obligation, to convert the outstanding value of the Note and any accrued and unpaid Interest thereon, into the equity securities and/or debt instrument to be issued pursuant to the Capital Raise, at the same terms and conditions.

# Ortho Regenerative Technologies Inc.

## Notes to Interim Financial Statements

In thousands of Canadian dollars except for share and per share amounts

Each Warrant will entitle the holder thereof to purchase one Class "A" common share (each, a "Share") at an exercise price of \$0.50 at any time up to 24 months following December 13, 2021. The Notes and the Warrants are subject to a statutory hold period under the applicable securities laws and in such case the certificates evidencing the Notes and the Warrants will bear a legend to that effect, as applicable. The Company has paid \$21 in commissions and issued 21,700 finders' warrants in connection with the convertible note financing, in compliance with applicable securities laws. This leaves the Corporation with a total net proceeds of \$1,027.

The Corporation valued the debt component of the Convertible notes by calculating the present value of the principal and interest payments, discounted at a rate of 24%, being management's best estimate of the rate that a Convertible note would bear as at December 13, 2021. On initial recognition, the host instrument was \$958 and the warrants at \$170. Since an anti-dilutive clause is attached to the warrants, the Corporation determined that the warrants were classified as financial liability. The Corporation utilized a Monte Carlo simulation model to determine the fair value of the warrants. Transaction costs were netted against the liability and will be amortized using the effective interest method over the period of the debt.

Accretion expense included in financing expense on the statement of loss and comprehensive loss, attributable to the Notes During the three months ended April 30, 2022 was \$43 (nil During the three months ended April 30, 2021). In addition, \$41 of interest expense was recorded, of which \$42 is included as Interest payable on debentures in the statement of financial position.

### b) Warrants

	April 30, 2022	January 31, 2022
Opening balance – December 13, 2021	139	170
Fair Value adjustment	(39)	(31)
<b>Total</b>	<b>100</b>	<b>139</b>

During the three months ended April 30, 2022, the Corporation recorded a gain on revaluation of their related Warrants' fair value of \$39. This adjustment mainly results from the decrease in the Corporation's share price going down from \$0.35/share on January 31, 2022 to \$0.24/share as of April 30, 2022, net of the impact of the exercise price amendment discussed in Note 11.

## 11. Share Capital and other equity instruments

### (a) Share capital

The Authorized Share Capital is composed of

- Unlimited number of Class "A" common shares, with no par value
- Unlimited number of Class "AA" preferred shares, non-voting, non-cumulative dividends at the discretion of the directors, no par value
- Unlimited number of Class "B" preferred shares, redeemable, non-voting, non-cumulative dividends of 1%, no par value

Class "A" common shares	#	\$
<b>Balance as at January 31, 2022</b>	34,956,093	7,891
Common shares issued	<b>16,082,683</b>	<b>2,673</b>
Share issue costs	-	<b>(109)</b>
<b>Balance as at April 30, 2022</b>	<b>51,038,776</b>	<b>10,455</b>

On April 5, 2022, the Corporation completed a non-brokered private placement of units and issued 16,000,000 units at a price of \$0.20 per Unit for total gross proceeds of \$3,200 (the "April 2022 Private Placement") of which an amount \$2,702 was received in cash, an amount of \$220 was issued as a replacement to convertible notes issued in December 2021 and the balance in compensation for accounts payable and accrued liabilities. Each Unit consists of one (1) Class "A" common share of the Company (each, a "share") and one share purchase warrant (each a "Warrant"). Each Warrant will be exercisable into one (1) Share in the capital of the Company at the price of \$0.35 per Warrant Share for a period of 24 months from closing (the "Warrant Maturity Date"). Until the Warrant Maturity Date, should the closing price of the Shares be greater or equal to \$0.50 for ten (10) consecutive trading days, the Company may give notice to the Warrant holder, at any time after the statutory 4-month hold period, that it must exercise its remaining Warrants within a period of 30-days from the date of receipt of the notice, failing which the Warrants will automatically expire. The Company has paid \$131 in commission fees and issued 657,650 finders' warrants in connection with the Private placement, in compliance with applicable securities laws.

# Ortho Regenerative Technologies Inc.

## Notes to Interim Financial Statements

*In thousands of Canadian dollars except for share and per share amounts*

As a result of the closing of the April 2022 Private Placement, the Corporation had an obligation to amend the terms of certain of its previously issued securities based on anti-dilution provisions governing these securities. Therefore, the Convertible Debentures bearing interest of 10% per annum and maturing on May 1, 2023 were amended such that their conversion price was reduced from \$0.30 to \$0.20 to match the purchase price of units issued under this April 2022 Private Placement. In addition, the exercise price of the 1,075,000 warrants and the 20,625 Finder's warrants issued on December 13, 2021 issued in connection with the Convertible notes financing were reduced from \$0.50 to \$0.35 to match the exercise price of the Warrants comprised in the Units sold under this Private Placement.

### **(b) Share based compensation**

The Corporation implemented an incentive stock option plan for directors, officers, employees and consultants to participate in the growth and development of the Corporation by providing such persons with the opportunity, through stock options, to purchase common shares of the Corporation. The stock option plan provides that the aggregate number of shares reserved for issuance, set aside and made available for issuance may not exceed 10% of the number of issued shares at the time the options are to be granted. The maximum number of options which may be granted to any one beneficiary shall not exceed 5% of the issued shares, calculated at the date the option is granted.

The stock option plan is administered by the Board of Directors of the Corporation and it has full and final authority with respect to the granting of all options thereunder. The exercise price of any options granted under the stock option plan shall be determined by the Board of Directors, subject to any applicable regulations or policies. The term and vesting of any options granted under the stock option plan shall be determined by the Board of Directors at the time of grant, and vary from one grant to another, however, subject to earlier termination in the event of dismissal for cause, termination other than for cause or in the event of death, the term of any options granted under the stock option plan may not exceed 8 years.

Options granted under the stock option plan are not to be transferable or assignable other than by will or other testamentary instrument or pursuant to the laws of succession to a qualified successor. In the event of death of an option holder, options granted under the stock option plan expire upon the earlier of the normal expiry date of the options or one year from the date of death of the option holder.

Subject to certain exceptions, if an employee, director, officer, consultant ceases to hold office or provide consulting services, options granted to such a holder under the stock option plan will expire 90 days after the holder ceases to hold office or such earlier date as the Board of Directors may decide at the date the options were granted. Notwithstanding the foregoing, in the event of a termination for cause of an option holder, all unexercised options held by such option holder shall immediately expire.

On April 8, 2022 (the "Date of Grant") the Corporation granted 2,000,000 stock purchase options (the "Options") to its newly hired CEO, Philippe Deschamps. Half of the Options will vest annually and equally over the first 3 years following the Date of Grant. The balance of the Options will vest based on achievements of predetermined operational and corporate milestones.

During the three months ended April 30, 2022 and 2021, the Corporation recorded compensation expense of \$42 and \$63, respectively, with corresponding credits to contributed surplus related to the issuance of stock options. The weighted average fair value of the options granted during the three months ended April 30, 2022, estimated by using the Black-Scholes option pricing model, was \$0.16 (\$0.38 for the year ended January 31, 2022).

The following table presents the common shares issuable on exercise of the share-based payment transaction granted during the year ended:

	Three months ended April 30, 2022		Year ended January 31, 2022	
	Number of Shares	Weighted Average Exercise Price	Number of Shares	Weighted Average Exercise Price
<b>Options outstanding, beginning of year</b>	<b>2,946,000</b>	<b>\$0.47</b>	2,746,000	\$0.47
Granted during the period	<b>2,000,000</b>	<b>\$0.20</b>	350,000	\$0.47
Options cancelled/expired	-	-	(150,000)	\$0.47
<b>Options outstanding, end of period</b>	<b>4,946,000</b>	<b>\$0.36</b>	2,946,000	\$0.47

All share-based payments will be settled in equity. The Corporation has no legal or contractual obligation to repurchase or settle the options in cash.

# Ortho Regenerative Technologies Inc.

## Notes to Interim Financial Statements

In thousands of Canadian dollars except for share and per share amounts

The following options were outstanding as at April 30, 2022:

Outstanding	Exercisable	Exercise price	Remaining contractual life (years)
75,000	75,000	\$0.60	6.50
1,015,000	1,015,000	\$0.50	0.75
950,000	850,000	\$0.36	3.19
100,000	75,000	\$0.70	6.90
65,000	32,500	\$0.58	6.41
245,000	245,000	\$0.37	3.23
220,000	110,000	\$0.72	6.52
126,000	94,499	\$0.71	6.64
100,000	100,000	\$0.30	3.14
50,000	37,500	\$0.47	6.90
2,000,000	-	\$0.20	7.95
<b>4,946,000</b>	<b>2,634,499</b>		

The fair values of the options issued during the three months ended April 30, 2022 were estimated using the Black-Scholes option pricing model, with the following assumptions:

Exercise price	<b>\$0.20</b>
Risk-free rate	<b>2.57%</b>
Volatility factor (i)	<b>88.46%</b>
Expected life (years)	<b>8</b>

(i) Volatility was determined using the historical share price of comparable companies as the Corporation has insufficient historical data.

### (c) Restricted Stock Units

On April 8, 2022 (the "Date of Grant") the Corporation granted 551,938 Restricted Stock Units ("RSU") to its newly hired CEO, Philippe Deschamps. Half of the RSU's will vest annually and equally over the first 3 years following the Date of Grant. The balance of the RSU's will vest based on achievements of predetermined operational and corporate milestones.

The following tables present the movement in outstanding RSUs during the current period:

	Three months ended April 30, 2022	Year ended January 31, 2022
	Number of RSUs	Number of RSUs
Options outstanding, beginning of year	-	-
Granted during the period	551,938	-
Options outstanding, end of period	551,938	-

### (d) Warrants

The following tables present the common shares issuable on exercise of full warrants issued during the current period:

	Number of Shares	Weighted Average Exercise Price
Balance as at January 31, 2022	17,407,981	\$0.55
Granted during the period	16,657,650	\$0.35
Expired during the period	(218,619)	\$0.50
<b>Balance as at April 30, 2022</b>	<b>33,847,012</b>	<b>\$0.42</b>

2041	2,349	2,385
2042	2,941	2,973
	<b>10,644</b>	<b>10,586</b>

### 17. Financial Instruments

During the three months ended April 30, 2022, the convertible debentures conversion options were revaluated and reclassified from equity to liabilities and carried at fair value through profit and loss ("FVTPL"). Warrants issued as part of the Convertible notes in December 2021 are also being carried at FVTPL. For the year ended January 31, 2022, the Corporation had no financial instruments carried at fair value through other comprehensive income ("FVTOCI").

As at April 30, 2022:	FVTPL	Amortized cost
<b>Financial asset:</b>		
Cash	-	2,190
<b>Financial liabilities:</b>		
Accounts payable and accrued liabilities	-	1,078

Conversion options classified as liability	848	-
Warrants classified as liability	100	-

# Ortho Regenerative Technologies Inc.

## Notes to Interim Financial Statements

In thousands of Canadian dollars except for share and per share amounts

As at January 31, 2022:	FVTPL	Amortized cost
<b>Financial asset:</b>		
Cash	-	313
<b>Financial liabilities:</b>		
Accounts payable and accrued liabilities	-	607
Accrued interest on debentures	-	177
Convertible notes	-	934
Long-term loans	-	40
Convertible debentures	-	2,387
Non-convertible debentures	-	2,349
Conversion options classified as liability	1,582	-
Warrants classified as liability	139	-

The Corporation categorizes its financial assets and liabilities measured at fair value into one of three different levels depending on the observation of the inputs used in the measurement. The three levels are defined as follows:

**Level 1:** Fair value is based on unadjusted quoted prices for identical assets or liabilities in active markets;

**Level 2:** Fair value is based on inputs other than quoted prices included within Level 1 that are not observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

**Level 3:** Fair value is based on valuation techniques that require one or more significant unobservable inputs.

The fair value of a financial instrument is approximated by the consideration that would be agreed to in an arm's length transaction between willing parties and through appropriate valuation methods, but considerable judgement is required for the Corporation to determine the value. The actual amount that could be realized in a current market exchange could be different than the estimated value. The fair values of financial instruments included in current assets and current liabilities approximate their carrying values due to their short-term nature.

### 18. Financial Risk Factors

The Corporation's activities expose it to financial risks: market risk, more specifically cash flow and fair value interest rate risk, and liquidity risk. The Corporation's overall risk management program focuses on the unpredictability of the financial market and seeks to minimize potential adverse effects on its financial performance. The Corporation does not use derivative financial instruments to hedge these risks.

#### (a) Credit risk

Credit risk arises from cash deposited with a financial institution. The Corporation reduces this risk by dealing with creditworthy financial institutions.

#### (b) Market risk

##### (i) Cash flow and fair value interest rate risk

The Corporation is exposed to fair value interest rate risk due to its short-term debt and convertible debenture negotiated at a fixed rate.

##### (ii) Currency risk

The Corporation has cash and accounts payable and accrued liabilities denominated in USD, and EUR. The Corporation does not hold financial derivatives to manage fluctuation in these risks.

The following presents the accounts that are exposed to foreign exchange volatility, as at:

	April 30, 2022		January 31, 2022	
	Foreign Currency	CAD equivalent	Foreign Currency	CAD equivalent
Cash – USD	1,041	1,332	100	128
Accounts payable and accrued liabilities – USD	430	550	294	374
Accounts payable and accrued liabilities – EUR	-	-	6	8

A plus or minus 5% variation in exchange rate, all else being held equal, would result in a foreign exchange gain or loss of \$94 (\$55 in fiscal 2022).

# Ortho Regenerative Technologies Inc.

## Notes to Interim Financial Statements

In thousands of Canadian dollars except for share and per share amounts

### (c) Liquidity risk

Liquidity risk is the risk that the Corporation will not be able to meet its obligations as they fall due. The following are the contractual maturities of financial liabilities calculated based on contractual undiscounted cash flows including interest coupons (if applicable):

	<i>Carrying value</i>	<i>Contractual cash flows</i>	<i>Less than 12 months</i>	<i>Greater than 12 months</i>
<b>As at April 30, 2022:</b>	\$	\$	\$	\$

Convertible debentures	2,387	3,141	278	2,863
Non-convertible debentures	2,349	3,550	300	3,250
Convertible notes	934	1,168	1,168	-
<b>Total</b>	<b>6,494</b>	<b>8,683</b>	<b>2,530</b>	<b>6,153</b>

### (d) Capital risk management

The Corporation's objective when managing capital is to maintain its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders. The Corporation's definition of capital includes equity, comprised of issued common shares, warrants and contributed surplus. The Corporation's primary objective with respect to its capital management is to ensure that it has enough financial resources to meet its financial obligations. To secure the additional capital necessary to carry out these plans, the Corporation will attempt to raise additional funds through the issuance of debt, equity or by securing funds from strategic partners. The Corporation is not subject to any externally imposed capital requirements.

### 19. Related Party Transactions

Accounts payable due to École Polytechnique, a partner of Polyvalor	3	4

### 20. Commitments

In June 2015, the Corporation entered into collaborative research agreement with École Polytechnique which stipulated that when the Corporation's products are commercialized, it must make non-refundable payments to Polyvalor, a shareholder of the Corporation, equal to 1.5% of net sales. On September 21, 2021, the Corporation extended its ongoing Collaborative Research Agreement with Ecole Polytechnique until August 2022.

### 21. Subsequent Event

On May 19, 2022, the Corporation issued 500,000 warrants with an exercise price of \$0.35 per Common Share and expiring April 30, 2023 as compensation to non-related parties providing social media support and other corporate services.
